写在前面

算上小学阶段，同学们已经有五年英语学习的经历，关于整个八年级学段的学习目标，我们的对话可以直接和“专业”一些了。

学习的内容从两册教材的目录即可了然：八个模块所含的十六个话题，从历史到未来，从科技到文学，从学校到社会，从物质到精神，几乎无所不包。足见我们多么希望你们在你们的思维和学习空间里注入尽量多的英语元素，以利你们在最自然的情景中掌握这门语言。

建议你们将“读 (Reading)”和“课题 (Project)”结合起来思考。不仅因为“课题”的设计与课文有内在联系，还因为“阅读”和“制作”间存在着最完美的互补——读，产生疑问或兴趣，去搜索并了解，加深领悟，然后换一种形式，“变成”课本剧、小人书、小词典表达出来。那样的读是最生动有效的；那样的“制作”就是将知识消化、沉淀的过程。

“听 (Listening)”的材料包括采访、对话、故事片段、广告等体裁，主要训练听辨不同种类的数字表达法、获取关键信息、排序、标识地图等技能。与其对应的当然是“说 (Speaking)”：上册的重点在语音语调的地道；下册的重点是“说”得体，尤其关于“警示”“告知”“投诉或回应投诉”“道歉”等等，帮助大家掌握一些功能意念的规范表达法。

“写 (Writing)”与七年级比，要上一个台阶：其一，要求连句成段且逻辑顺畅，不仅需要片段的构思，还得有点想像力和创造性；其二，涉及的体裁、题材更多，有看图写故事，看表格写分析报告，根据材料介绍人物、动物，为图片配说明文字等等。下册还将接触更多实用文体，诸如书信、便条、申请书之类。初学写作是少不得模仿的，建议大家在阅读中留意寻找范本，如果还能把范本作比较，择其上而仿之，那么，进步会非常快。

“语法 (Grammar)”其实是一个纵向的板块。本年段的主要语法项目涉及不定代词，基数词和序数词，动词不定式，现在完成时，过去进行时，被动语态，条件状语从句和原因状语从句等。

阅读的广度和文化的深度是从来没有边际和底线的，要真正学好一门语言，这两个方面不可或缺，而且多多益善。因此，我们依然精心编写了配合单元话题的“补充阅读 (More practice)”和“文化角 (Culture corner)”内容。其广度和深度都比七年级更胜一筹，帮助大家提升对英语语言的感知和修养。

最后说一下英语学习的“学习技能 (Study skills)”，如何把教材所传授的“技”变为自己的“能”，不靠纸上谈兵，唯熟能生巧。所以，要勤奋地运用各类信息工具——辞典、网络、媒体，多看、多查、多记、多想，不放过任何一种操作性的锻炼，是获得学习技能的唯一途径。

能否达成目标？一年后见！

We use *some* and *any* to talk about amounts.

I have **some** questions about dinosaurs.
 She **does not have any** questions about dinosaurs.
 Do they have **any** questions about dinosaurs?
 Yes, they have **some** questions about dinosaurs.

Work out the rule

- We use *some* and *any* before (plural/singular) countable nouns and uncountable nouns.
- We usually use (*some/any*) in positive statements. We usually use (*some/any*) in negative statements and questions.

Things to remember

We also use *some* in questions when we expect the answer to be "yes".

May I have **some** noodles? Would you like **some** tea?

A1 Wendy and her mother are checking what food to buy. Look at the shopping list and the picture. Then ask and answer questions in pairs. Follow the example.

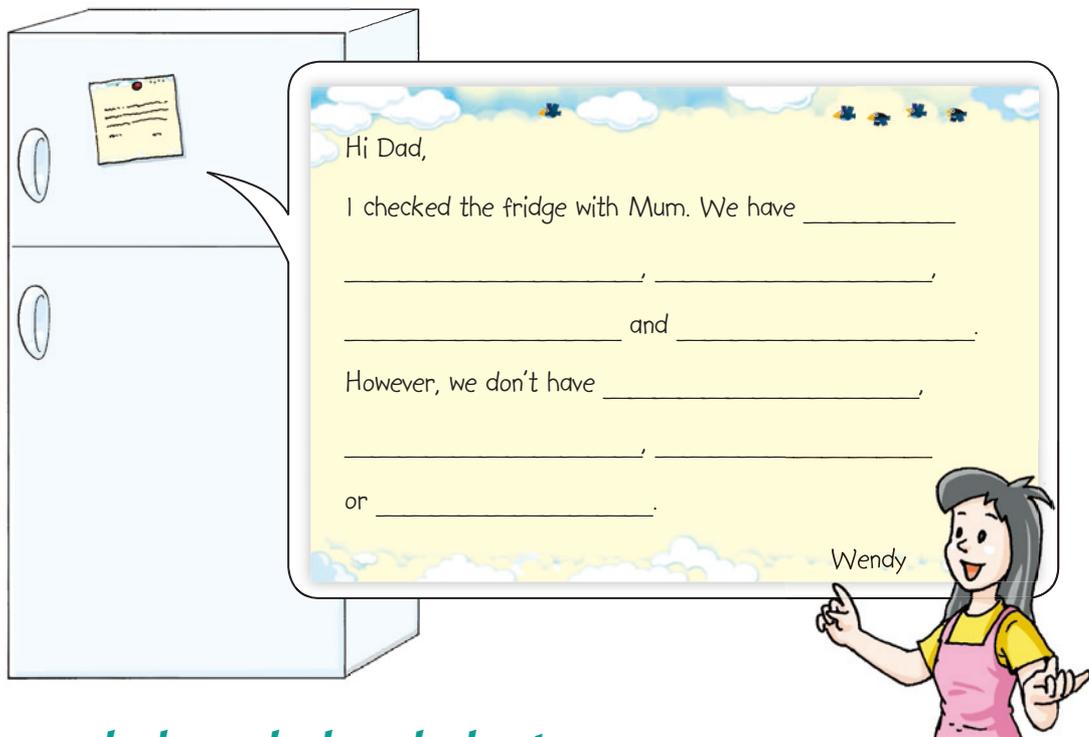

Shopping list

Read the conversation below and stress the underlined words.

Daisy: Happy birthday, Benny. This is for you.

Benny: An encyclopaedia? Thank you, Daisy!

Daisy: You're welcome. I'm sure you'll learn many things from it.

Benny: Yes, I'm sure I will. It's always useful to have an encyclopaedia around the house.

A Read the following encyclopaedia article about big attractions in Australia and answer the questions below.

Australia's big attractions

Australia is a very big country. It also has many big attractions.

The Big Banana

The Big Banana is in Coffs Harbour. It was made in 1964 by John Landy. Landy wanted something to make people come to his fruit shop, so he built the Big Banana. The idea worked. Many people visited his fruit shop and took pictures of the Big Banana. Soon people all over Australia began making big things.

The Big Merino

The Big Merino is in the city of Goulburn. Merinos are a type of sheep. They can live in dry weather. Some places in Australia are very dry, so these sheep are very important to the farmers there. Inside the Big Merino, there is a small museum about the history of wool in Australia. Visitors can also climb up to the Big Merino's head and look at the view through its eyes.

- 1 When was the Big Banana built?
- 2 Why was the Big Banana built?
- 3 Why are merinos important to the farmers in Australia?
- 4 What can you find inside the Big Merino?
- 5 What can you do inside the Big Merino's head?

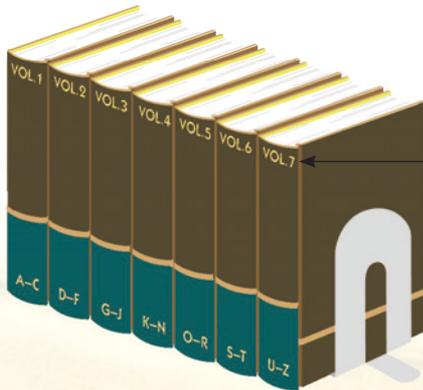

B Do you enjoy reading encyclopaedia articles? What can you find in encyclopaedias? Tell your classmates about some interesting things in encyclopaedias.

Study skills

Using reference books (3): Using encyclopaedias

Some encyclopaedias give information on only one subject. Some encyclopaedias give information on all kinds of subjects.

An encyclopaedia often consists of a number of books. These books are called **volumes**.

This is the guide word at the top of each page.

Sometimes an encyclopaedia tells us where to look for more information on a similar subject.

The subjects are usually in alphabetical order.

Violin 358

used mainly in orchestras, but it is now also popularly used as a solo instrument.

Violin: a wooden, stringed instrument with four strings tuned in perfect fifths. It is the smallest among the family of stringed instruments. Sounds are produced by drawing a horsehair bow across one string or multiple strings with the right hand, and stopping the strings against the fingerboard with the fingers of the left hand. This instrument is supported by the left shoulder and held firm by the chin.

A full-size, or 4/4, violin with a bow

Children typically use smaller stringed instruments than adults. In general, violins come in eight different sizes: full-size (4/4), 3/4, 1/2, 1/4, 1/8, 1/10, 1/16. Sometimes 1/32 and even 1/64 violins can be found, but these smaller sizes are generally rare. The body length of a full-size, or 4/4, violin is about 35 cm while a 3/4 violin is about 33 cm, and a 1/2 one is approximately 30 cm.

The violin is used in many different kinds of music, most notably classical music. It is one of the most important instruments in an orchestra. In an orchestra, violins are divided into two sections, of which the first violins play the melodic lines and the second violins play the harmonic lines. The violin also plays a significant role in jazz music and pop music.

Violinist: a person who plays the violin.

Violist: a person who plays the viola or the viol.

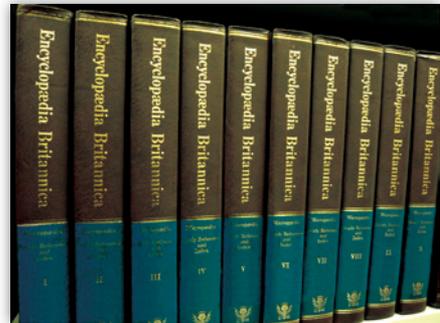

Violoncello: see cello.

Encyclopaedia Britannica

The *Encyclopaedia Britannica* is a world-famous encyclopaedia. It is the oldest English-language encyclopaedia. The first edition was published in 1768, and since then there have been 15 editions. The 15th edition is made up of 32 volumes. Together they contain about 40 million words on half a million topics.

The 15th edition was the last printed edition. Today you can find the *Britannica* online.

B Before you read

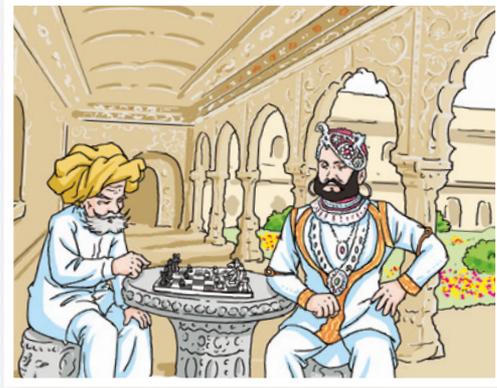

Look at the pictures, the title of the story and the first sentences of paragraphs 1 and 2 on page 19. Then circle the correct answers.

- Who are the people in the first picture?
 - The king and his son.
 - The king and his brother.
 - The king and an old man.
- What are they doing?
 - Playing chess.
 - Growing rice.
 - Playing cards.
- Where did the story probably happen?
 - In China.
 - In India.
 - In Japan.

The king and the rice

A long time ago, there was a king in India. The king's favourite game was chess.

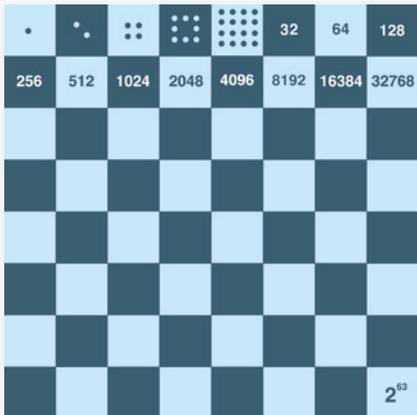

One day, a wise old man
 5 came to the palace and the king challenged him to a game. The king promised the old man, "You can have any prize if you win the game."

10 The old man said, "If I win the game, I'd like one grain of rice for the first square of the chessboard, two for the second, four for the third ... I'd like you to double the amount for each of the rest of the squares."

"Is that all?" asked the king. "Wouldn't you like gold or silver instead?"

15 "No, just rice," replied the old man.

The king and the old man played the game for a long time. Finally, the old man won. So the king ordered his men to collect a bag of
 20 rice. He put one grain on the first square, two on the second, and so on. The king quickly realized the problem—even with all the rice in the country, he would still not
 25 have enough rice to put on all the squares!

C Vocabulary

Grammar

A Cardinal and ordinal numbers

We use **cardinal numbers** to count things.

3	three	13	thirteen	20	twenty	70	seventy
11	eleven	15	fifteen	30	thirty	82	eighty-two
12	twelve	18	eighteen	50	fifty	98	ninety-eight

100	one hundred
200	two hundred
375	three hundred and seventy-five

1,000	one thousand
4,189	four thousand one hundred and eighty-nine
15,362	fifteen thousand three hundred and sixty-two
100,000	one hundred thousand
285,643	two hundred and eighty-five thousand six hundred and forty-three

1,000,000	one million
3,367,982	three million three hundred and sixty-seven thousand nine hundred and eighty-two

Work out the rule

- In the **cardinal numbers**, we do not add *-s* to *hundred*, _____ and _____.
- With large numbers, we put _____ between *hundred* and *ten*.

We use **ordinal numbers** to show the order of things.

1st	first	7th	seventh	13th	thirteenth	19th	nineteenth
2nd	second	8th	eighth	14th	fourteenth	20th	twentieth
3rd	third	9th	ninth	15th	fifteenth	21st	twenty-first
4th	fourth	10th	tenth	16th	sixteenth	33rd	thirty-third
5th	fifth	11th	eleventh	17th	seventeenth	40th	fortieth
6th	sixth	12th	twelfth	18th	eighteenth	100th	hundredth

Work out the rule

We form most **ordinal numbers** by adding _____ to the **cardinal numbers**. There are exceptions, like *first*, *second* and *third*.

The students are standing in a line. They each have a number (from 1 to 28). Fill in the blanks with the cardinal numbers on the left or ordinal numbers on the right.

1	May	May is the ⁽¹⁾ _____.
⁽²⁾ _____	Alan	Alan is the <i>second</i> .
3	Danny	Danny is the ⁽³⁾ _____.
4	Jane	Jane is the ⁽⁴⁾ _____.

Strong and weak forms

Some words have both a strong form and a weak form.

	a	an	for	of	to
Strong form	/eɪ/	/æn/	/fɔ:(r)/	/ɒv/	/tu:/
Weak form	/ə/	/ən/	/fə/	/əv/	/tə, tu/

	the	and	can	have	he	do

Weak form	/ði, ðə/	/ən(d), n/	/kən/	/həv, əv/	/hi/	/də, du/

In most sentences, we use the weak forms of these words.

He went **to the** hospital **and** visited **a** friend.
/hi went tə ðə 'hɒspɪtl ən 'vɪzɪtɪd ə frend/

Sometimes we use the strong forms for emphasis.

S1: You **can't** dance. S2: Yes, I **can**.
/ju kɑ:nt dɑ:ns/ /jes aɪ kæn/

Listen to the conversation below. Pay attention to the pronunciation of the words in blue. Then practise it in pairs.

- A** May found some figures about traffic accidents in her city. She drew a line graph and wrote a report. Complete the report below.

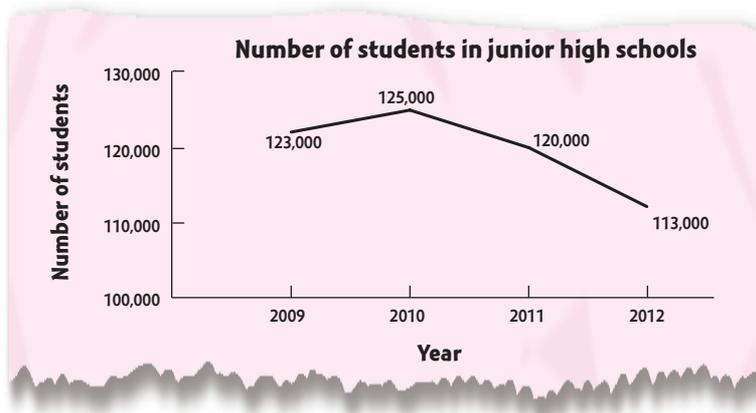

Top tip

Write the numbers in figures, not in words.

Traffic accidents (July–November)

The graph shows that there were ⁽¹⁾ 208 traffic accidents in our city in July. In ⁽²⁾ _____, the number ⁽³⁾ rose to ⁽⁴⁾ _____ and then ⁽⁵⁾ fell to ⁽⁶⁾ _____ in ⁽⁷⁾ _____. In ⁽⁸⁾ _____, the number ⁽⁹⁾ _____ again to ⁽¹⁰⁾ _____. It ⁽¹¹⁾ _____ to ⁽¹²⁾ _____ in ⁽¹³⁾ _____.

- B** Look at the line graph below about the number of students at junior high schools in May's city. Then write a report by following the example in A.

*  **More practice**

A Read the online article and then complete the flow chart about the development of counting methods.

Counting before numbers

Before the invention of written numbers, people used many different ways to count things.

At first, people used their fingers, and even their toes. However, they could only count small numbers in this way.

After that, they began to make small marks on sticks and bones. This helped them count bigger numbers. They used them to count things like the days of the month, the amount of food and the number of animals they had.

Then people began to use tokens made from clay or small stones. This helped them count even bigger numbers. They often put the tokens on pieces of string so that they could carry them around easily. This developed into tools like the abacus.

Finally, people began to develop systems of written marks to show different numbers, and this led to the Hindu-Arabic system (0–9). We are still using this system today.

First, people used ⁽¹⁾ _____.

After that, they made ⁽²⁾ _____.

Then they used ⁽³⁾ _____.

Finally, they began to develop ⁽⁴⁾ _____.

This led to ⁽⁵⁾ _____.

B Are there any other ways of counting? Discuss this with your classmates.

Numbers around the world

People around the world write numbers in different ways. The following shows how people from different cultures write one to five.

Chinese: 一、二、三、四、五

Romans: I, II, III, IV, V

English: one, two, three, four, five

However, most people around the world use Arabic numbers (1, 2, 3, 4, 5, etc.) today.

Do you know how people write numbers in other cultures?

A mini-encyclopaedia of numbers

How much do you know about numbers? In this project, you will make a mini-encyclopaedia of numbers.

A In groups, brainstorm some topics about numbers. Use the following spidergram to help you.

B Each group should decide on a topic and then do some research on it.

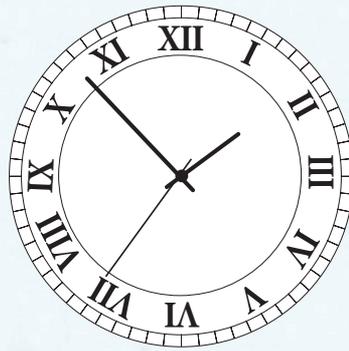

C In groups, write a short article on your topic. Follow the example.

Roman numbers

The ancient Romans had a different way of writing numbers. They used letters from their alphabet. For example, the number 12 is “XII” (10 + 1 + 1).

I	=	1	L	=	50	D	=	500
V	=	5	C	=	100	M	=	1,000
X	=	10						

Today we still see Roman numbers in many places, for example on clock faces, on buildings or in books.

Unit 3

Computers

Getting ready

In this unit, you will learn some facts about computers.

Reading

- Read an article about computers.

Listening

- Listen to a woman making a phone order.

Grammar

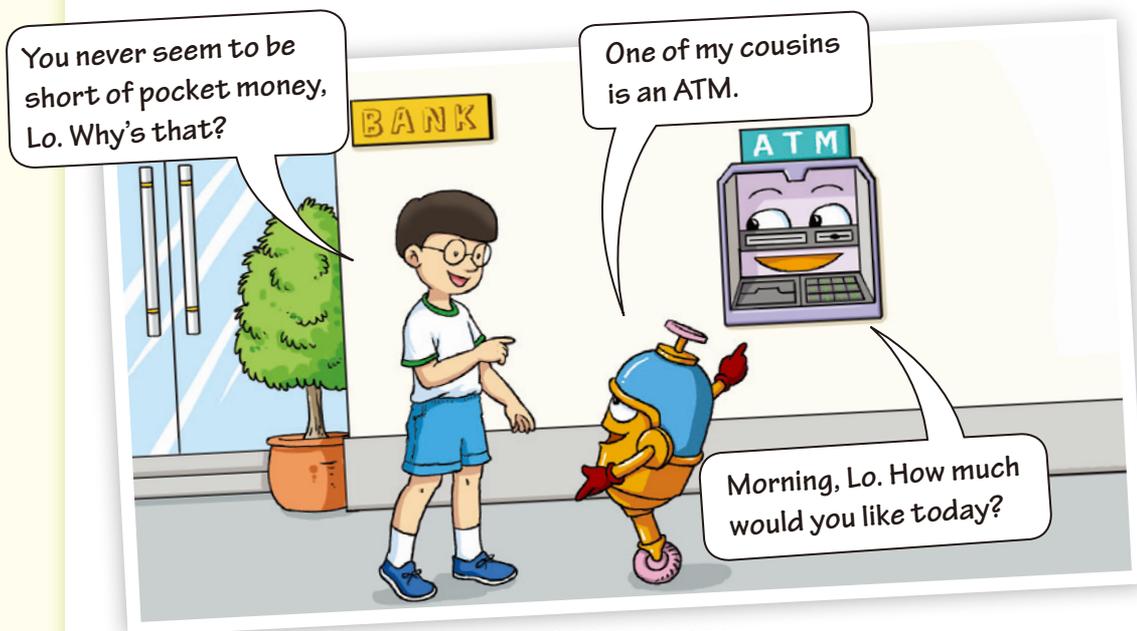

- Learn how to compare things by using **the comparative of adjectives**.
- Learn how to compare things by using **the superlative of adjectives**.

Speaking

- Learn to give extra stress to the most important word in a sentence.
- Do a survey about using computers at home.

Writing

- Write an email about monitors.

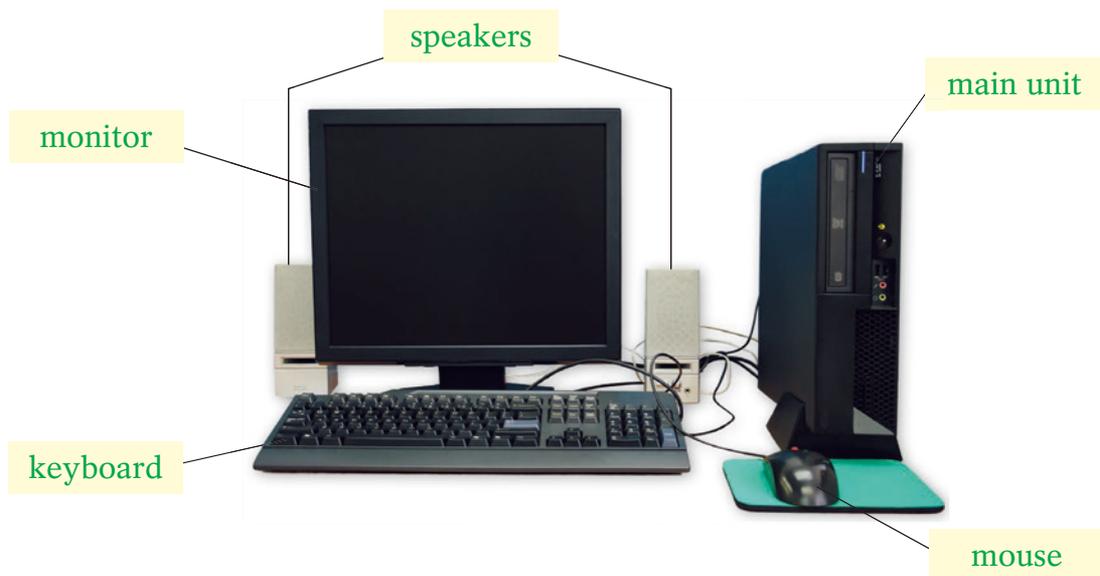

Reading

A What do you know about ...?

How much do you know about computers? Look at the photo below and complete the sentences with the correct names.

- 1 The _____ shows words and pictures.
- 2 We use the _____ for typing.
- 3 The “brain” of a computer is in the _____.
- 4 We move the _____ to control the computer.
- 5 We hear sound from the _____.

B Before you read

Look at the pictures, the title and the sub-headings of the article on page 35. Then tick (✓) the facts that the article probably talks about.

- 1 Computers are getting smaller and better.
- 2 Computers can do important jobs like flying planes.
- 3 Computers may work as doctors.
- 4 Computers are expensive.

Computer facts

Smaller and better

In the 1940s, the first computers were bigger than cars. Now computers are becoming smaller and better.

- 5 Some computers are tiny. You may be unaware of them. There is probably one inside your TV or washing machine. You depend on computers more than you realize.

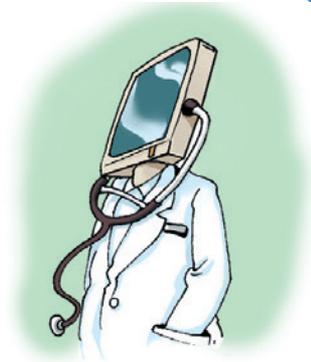

What can we do with computers?

- 10 We can use computers to calculate. They can calculate at a faster speed than we can and almost never give wrong answers. We can also type and draw things with them. In addition,
- 15 computers can do important jobs like operating railways and flying planes and spaceships.

Is a computer cleverer than me?

- The answer is "No". Your brain can produce new
- 20 ideas but computers cannot. However, one day computers may be able to do a better job than human beings. For example, they may be better than doctors at doing their job.

- What will happen to us if computers can do all our
- 25 jobs? Will we have nothing to do? Computers may change our lives, but will they make them better?

C Vocabulary

C1 The words in italics explain the meanings of some words on page 35. Find these words to complete the sentences. Change their forms if necessary.

- 1 If something is *very small*, it is _____ . (line 5)
- 2 Some young people always *need help from* their parents. They should learn to _____ themselves. (line 8)
- 3 We had fun *and* learnt something new *as well*. We had a good time. _____, we learnt a lot. (line 14)
- 4 When we *make a machine work*, we _____ it. (line 16)

C2 Complete the conversation below with the words from the box.

Mark: I bought a new computer.

Helen: Why?

Mark: I bought my first computer five years ago. I used it almost every day, and it became really slow.

Helen: I see. So how's your new computer?

Mark: It was really ⁽¹⁾ _____, but it works at a much faster ⁽²⁾ _____ than my old one. ⁽³⁾ _____, it has a larger monitor.

Helen: I also ⁽⁴⁾ _____ my computer a lot these days. I use it to write reports, and to get on the Internet too. My computer works well, so I'm not going to buy a new one.

Sub-headings

Sometimes a long passage has several small parts. Each part has a title. We call the title a **sub-heading**. It usually tells us the topic of the paragraph(s) below it.

For example, in the article on page 35, "*Smaller and better*" and "*What can we do with computers?*" are sub-headings.

D Comprehension

D1 Read the article on page 35 and complete the answers with the examples from the article.

1 S1: There may be tiny computers in your home.

S2: Where, for example?

S1: Inside your TV or washing machine.

2 S1: We can do many things with computers in our daily life.

D2 Read the article again and answer the questions below in complete sentences.

1 What were the first computers like?

2 Why are we unaware of some computers?

3 Are computers cleverer than you and me? Why or why not?

* **D3** Discuss and answer the questions below with your classmates.

1 Do you depend on computers a lot in your daily life? Give examples.

2 Do you agree that computers will be able to do all our jobs in the future? Give reasons.

When we compare two people or things, we can use **the comparative of adjectives**. We form **the comparative of adjectives** like this:

Adjectives	Comparative of adjectives
cheap	cheaper
tall	taller
interesting	more interesting
expensive	more expensive

My book is **more interesting than** yours.

Work out the rule

- To form **the comparative of adjectives**, we often add _____ to short adjectives and use _____ with long adjectives.
- We often use _____ after **the comparative of adjectives**.

Complete the conversation below and on page 40 with the comparative of the adjectives from the box.

big expensive heavy light small

Salesman: Can I help you, sir?

David: Yes, I need a suitcase. Can you tell me about these two?

Salesman: Sure. The red one costs ¥2,500, and it's made of leather.

David: I see. The red one is ⁽¹⁾ _____ than the black one. What about the weight? Which one is ⁽²⁾ _____?

Salesman: The black one. It's made of plastic. Try them, sir.

David: You're right. The red one is ⁽³⁾ _____ than the black one, and it's ⁽⁴⁾ _____ than the black one.

Salesman: Do you have a lot of things to carry?

David: Yes, I do. I'll have the black one because it's ⁽⁵⁾ _____ than the red one.

Salesman: Thank you very much, sir.

B The superlative of adjectives

When we compare more than two people or things, we use **the superlative of adjectives**.

The red laptop is **the smallest** among the three.

We form **the superlative of adjectives** like this:

Adjectives	Superlative of adjectives
high	the highest
careful	the most careful
interesting	the most interesting

Work out the rule

- To form **the superlative of adjectives**, we often add _____ to short adjectives and use _____ with long adjectives.
- We usually use _____ in front of **the superlative of adjectives**.

Extra stress

We already know two rules about sentence stress:

- Stress nouns, verbs, adjectives, adverbs and numbers.
- Do not stress words like *a*, *the*, *is* and *have* except for special reasons.

Here is a third rule:

- Give extra stress to the most important word in the sentence. You, the speaker, must decide what the most important word is.

A1 Read the conversation below and practise it in pairs. Give extra stress to the words underlined twice.

Amy: What do you think of computers, Frank? Are they cleverer than human beings?

Frank: No, I don't think so.

Amy: Why not? Computers can do a lot of things!

Frank: Maybe, but human beings created computers!

Amy: That's true.

A2 Read the conversation below and draw an extra line under the words you would give extra stress to. Then practise it in pairs.

Frank: Which kind of computers are better, desktops or laptops?

Amy: Laptops, I think.

Frank: Why?

Amy: Laptops are lighter. They're easier to carry around than desktops!

Frank: Yes, but desktops are often cheaper than laptops. And I don't really have much money.

Amy: Well, then a desktop is probably a better choice for you.

B Speak up

B1 In groups, do a survey about using computers at home. Use the following questions to help you. You must add at least one more question of your own.

- 1 Do you have a computer at home?
- 2 How often do you use the computer?
- 3 What do you usually do on the computer?
- 4 How much time do you spend playing computer games every week?
- 5 How do you use the computer to help you study?
- 6 *Your own question(s):* _____

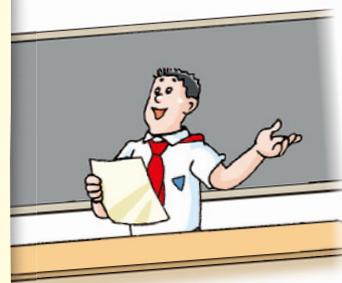

B2 Go around the class and interview other students. Make notes of their answers. Then each group should report their findings to the class. Use the following plan to help you.

We found that ... of the class have computers at home.

... use computers almost every day, and ... don't use computers very often.

... often ... on the computer at home.

Computer game problems

Good afternoon, parents and teachers. Thank you for attending this meeting.

Last weekend, one of our students went to hospital. The student played computer games on the Internet all day Saturday without stopping to drink, eat or sleep. Finally, he became very ill.

Some students play computer games for too long. This is a serious problem. In the past, students used to play outside more often, but now they spend more time in front of computers. This is bad for their health.

Tomorrow we'll have some experts here to talk to the students about the bad effects of playing computer games. They'll also give some advice on how to use computers for studying.

I hope we can all work together to stop students from spending too much time playing computer games. Thank you for your time.

The light bulb

A Read the article about the inventor of the ballpoint pen, László Bíró. Then answer the questions below.

A pen giant

Do you know László Bíró? Maybe you do not, but you probably use his invention every day, and you may even have it in your hand right now!

Bíró (1899–1985) was the inventor of the ballpoint pen. He was born in Budapest, Hungary. In the 1930s, when he worked as a newspaper editor, he used a fountain pen almost every day. However, he had to refill it all the time. The ink also did not dry easily, and it sometimes made a mess on the paper. Bíró wanted a better pen. His brother, George, helped him develop a special ink. The ink dried easily. Then they developed a new type of pen.

There was a tiny ball at the tip of the pen. The ball rolled ink onto paper as it moved. They called it the “ballpoint” pen.

The ballpoint pen was a great success. Everyone loved it. Now millions of people use it all over the world every day.

People will always remember Bíró for his invention. Today in many English-speaking countries, people still use the word “biro” to refer to any kind of ballpoint pen.

- 1 Why did Bíró decide to invent the ballpoint pen?
- 2 How did Bíró’s brother help him invent the ballpoint pen?
- 3 How does the ballpoint pen work?
- 4 How do people remember Bíró for his invention today?

B Do you like to use ballpoint pens? Why or why not? Discuss these with your classmates.

The Kongming Lantern and the hot-air balloon

The Kongming Lantern is very popular all over Asia. It is a kind of paper lantern with a closed top and a small candle inside. The candle heats the air inside the lantern and makes it rise. People use the Kongming Lantern on important days and during festivals.

During the time of the Three Kingdoms, Zhuge Liang used such lanterns to give signals in battles.

The Kongming Lantern led to the invention of the hot-air balloon.

Do you know any other inventions that led to other inventions?

Grammar
A The present perfect tense

We use **the present perfect tense** to talk about things that happened in the past but have a connection to the present in some way.

I've **seen** almost all of the places of interest around Beijing.

I/You/We/They	have made have not made	a lot of new friends.
Have	I/you/we/they	made a lot of new friends?
Yes,		have.
No,	you/I/we/they	have not.
He/She/It	has made has not made	a lot of new friends.
Has	he/she/it	made a lot of new friends?
Yes,		has.
No,	he/she/it	has not.

Work out the rule

We form **the present perfect tense** with _____
or _____ + the **past participle** of the main verb.

Things to remember

- I/You/We/They have = I've/You've/We've/They've
He/She/It has = He's/She's/It's
have not = haven't has not = hasn't
- The **past participle** of a regular verb is usually the same as its past tense. You can find the **past participles** of some irregular verbs on pages 141 and 142.

Eric has been in Beijing for a week. Complete his email to his mother with the present perfect tense of the verbs in brackets.

To: Mum

From: Eric

Dear Mum,

I've been in Beijing for a week now. I ⁽¹⁾ _____ (meet) my host family. They're really friendly. My host brother Wei and I ⁽²⁾ _____ (play) a lot of football at a park near his home. We both enjoy football very much. Mrs Li, my host mother, ⁽³⁾ _____ (cook) me delicious Chinese food.

I ⁽⁴⁾ _____ (study) Chinese with my British classmates. We ⁽⁵⁾ _____ (see) some places of interest in Beijing too. However, I ⁽⁶⁾ _____ (not, visit) the Great Wall yet, and I ⁽⁷⁾ _____ (not, do) any shopping either. I'll do these things next week.

Love,
Eric

B The present perfect tense with *already*, *yet*, *ever* and *never*

We can use *already*, *yet*, *ever* and *never* with the present perfect tense.

Sarah has **already** seen many places of interest in Beijing.

Have you seen the Great Wall **yet**?

No, I have not seen the Great Wall **yet**.

Have you **ever** visited the Summer Palace?

No, I have **never** visited the Summer Palace.

Work out the rule

- We can use the adverbs *already*, *ever* and *never* (before/after) *have/has* and (before/after) the main verb.
- We often use *yet* at the (beginning/end) of a question or a negative sentence.

B1 Sarah wants to know whether the students from Beijing have visited any places in London before. Ask and answer questions in pairs. Follow the example.

S1: Has Alice ever seen Big Ben?

S2: No, she hasn't. She's never seen Big Ben.

S1: Has she ever visited Tower Bridge?

S2: Yes, she has. She visited it two years ago.

...

B2 Later Sarah is asking the students from Beijing about what they have and have not done in London. Ask and answer questions in pairs. Follow the example.

Robin	✓	✓

- try and make new friends.
- try new things, like the local food.
- keep a diary. Write about all your new experiences.

Speaking

A Talk time

Rhythm (strong and weak sounds)

In stressed syllables, we give the vowels a strong pronunciation (clear and long). In unstressed syllables, we give the vowels a weak pronunciation (unclear and short). This adds rhythm to words and sentences when we speak.

A1 Say these words. Make the underlined vowels strong. Make the dotted vowels weak.

ex <u>cept</u>	en <u>ter</u>	se <u>cret</u>	py <u>ra</u> mid	fa <u>nt</u> astic
----------------	---------------	----------------	------------------	--------------------

A2 Say these words. Mark the strong and weak vowels as above.

about	collect	nobody	animal	invention
-------	---------	--------	--------	-----------

A3 Listen to these sentences. Pay attention to the rhythm of each sentence.

- 1 There's a plane for America every day.
- 2 Denise has gone to work. She will be back at five o'clock.
- 3 How much does a ticket to Tokyo cost?
- 4 When you see Simon, can you give this book to him?

A4 Listen to the poem below. Pay attention to the rhythm.

There once was a man called Ed Heath,
Who sat on his set of false teeth.
He said, with a start,
"Oh, bless my poor heart!
I've bitten myself underneath!"

A Read the story and answer the questions below.

The story of 100,000 arrows

This is a story about two wise men—Zhuge Liang and Zhou Yu. The Chinese people have told it for many, many years.

One day, Zhou Yu gave Zhuge Liang an impossible task. He asked him to make 100,000 arrows within ten days. “No problem,” Zhuge Liang said. “I’ll bring you 100,000 arrows in three days.”

Zhuce Liang asked his soldiers to fill 20 large boats with many straw men. In the early morning of the third day, Zhuge Liang’s soldiers sailed the boats towards the camps of Cao Cao’s army on the other side of the river. The soldiers shouted and beat their drums loudly. When Cao Cao’s soldiers heard the sounds, they thought they were under attack. However, they could not see through the thick fog on the river. Cao Cao ordered his soldiers to shoot arrows towards the sounds of the drums and the shouting. Zhuge Liang’s boats were soon full of arrows.

Zhuce Liang’s soldiers then turned the boats around and shouted, “Thank you for your arrows, Cao Cao.” Zhuge Liang took all these arrows to Zhou Yu. There were more than 100,000 of them.

Rosie Bridge School

Memory Corner

Henry

- A great way to help you remember something is to imagine a picture of it in your mind. If you make the
- 5 picture big, strange or silly, you will remember it better. For example, to remember the word “smiles”, we can imagine there is a “mile” between the first letter and the last letter.
- 10 This makes it the longest word in the world. Remember: a picture is worth a thousand words.

Paula

- A good method for remembering the spelling of a word is to make
- 15 a short sentence with each letter of the word. For example, if you want to remember how to spell the word “because”, you can use the sentence “**B**ig elephants can always **u**nderstand small elephants”.

Millie

- You will forget something very
- 20 quickly unless you understand it well. For example, you may have trouble remembering the list of steps in the water cycle. However, it is easier to remember these steps
- 25 if you understand how the water cycle works.

C Vocabulary

C1 The words in *italics* explain the meanings of some words on page 99. Find these words to complete the sentences. Change their forms if necessary.

- 1 We go to school to learn new things and to train our _____. (*the brain*) (line 4)

- 3 She used a different _____ to do the Maths problem. (*a way of doing something*) (line 14)
- 4 Can you help me carry this box? It is too big. I have _____ carrying it. (*a problem*) (line 22)
- 5 If you wish to get a good job, there are many important _____ you should take. (*things that happen in a process*) (line 23)

C2 Complete the conversations below with the words from the box.

list silly spelling trouble worth

Flora: Don't be _____. It's too far from here. Let's take a bus.

Grammar

A Conditional sentences (2)

We have already learnt to use **conditional sentences** to talk about probable results.

We can also use **conditional sentences** to talk about results that will certainly happen.

Work out the rule

When we use a **conditional sentence** to talk about something that will certainly happen, both verbs should be in **(the simple present tense/the simple future tense)**.

Things to remember

We can also put the ***if*-clause** after the **main clause**.

Salt **disappears** if you **put** it into water.

A1 Read these *if*-clauses and draw lines to match them with the results.

Possible actions		Results	
1	If you take a fish out of water,	a	it grows.
2	If you switch off the lamp,	b	it dies.
3	If you put wood into water,	c	the room becomes dark.
4	If you water a plant,	d	it breaks.
5	If you drop a glass,	e	it floats.

A2 In pairs, make conversations about the sentences in A1 on page 103. Follow the example.

S1: **What happens if you take a fish out of water?**

S2: **It dies.**

S1: **Are you sure?**

S2: **Of course, I'm sure. If you take a fish out of water, it dies.**

A3 Complete these sentences with the words in brackets.

1 If you _____ ice, _____ water.

Loss of plosion

When two plosive consonants (e.g. /t/, /d/, /p/, /b/, /k/ or /g/) are next to each other, we do not pronounce the first one, and there is usually a short pause between them. We call this the loss of plosion. The following are some examples:

A1 Practise saying these words.

How to improve your memory

Memory is very important. It helps you remember who you are, where you live, what you have learnt and what you plan to do in the future.

So, how can you improve your memory?

It is important to exercise your brain. For example, you can do new things and change your daily habits. If you walk a different way to school or take a different bus, you will keep your brain active. You can try to memorize something new. You can try a Maths puzzle. You can also try to learn new skills or study a foreign language. Your brain gets lots of

regular exercise if you do any of these things.

If you live a healthy life, your memory will work better. You must have a balanced diet. You must give your brain enough time to rest. Unless you get enough sleep every night, you will not remember things well.

If you want your brain to work well, you also need to relax. If you get too worried, your brain will slow down, and your memory will become less sharp.

So, to improve your memory, you should exercise your brain, live a healthy life and stay relaxed.

Study skills

Making notes (2): Making notes from sentences and paragraphs

When you make notes from sentences, write down the most important words. You do not need to write complete sentences, or use *a*, *an*, *the*, etc.

Sentence: Some scientists believe that there are three types of memory—immediate, short-term and long-term.

Note: 3 types of memory—immediate, short-term, long-term

When you make notes from paragraphs, find the most important sentence in each paragraph and then write the sentence in note form. Sometimes you can draw diagrams to show the connection between the paragraphs.

Read the passage below and on page 111. Then complete the diagram on page 111 with the information from the passage.

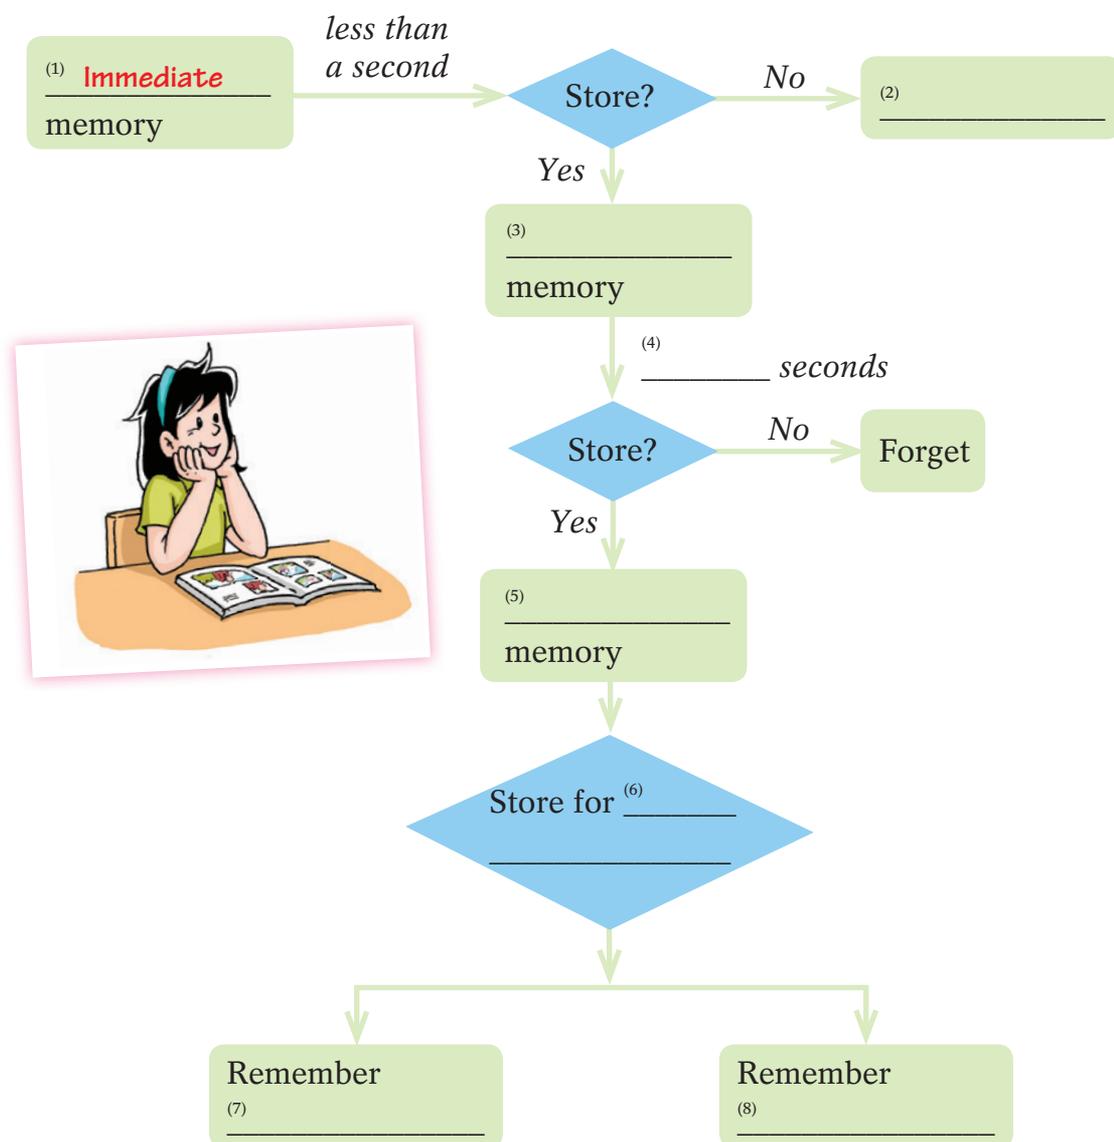

Three types of memory

Some scientists believe that there are three types of memory—immediate, short-term and long-term.

- Immediate memory holds information for less than a second, e.g. the name of a road you have just seen. Then it either forgets it or passes it into short-term memory.
- Short-term memory can hold about seven items of information at a time, e.g. telephone numbers. It holds them for about 30

seconds. Then it either forgets them or passes them into long-term memory.

- Long-term memory can hold information for the whole of our lives. Some scientists believe that there are two types of long-term memory. One type remembers events, e.g. the Beijing 2008 Olympic Games. The other remembers knowledge, e.g. the names of countries or the meanings of words.

World Memory Championships

The World Memory Championships first took place in London in 1991. In the championships, people have to memorize long lists of numbers, names, dates, words and also packs of playing cards. The record for memorizing 52 playing cards in the correct order is just 21.19 seconds!

How good is your memory? Look at these numbers for one minute. Then close your book. How many did you remember correctly? How did you remember them?

English Week at Rosie Bridge School

Last week, students at Rosie Bridge School worked hard to make their English Week a big success.

- 5 There was an English book fair in the library and a treasure hunt. Some students put on an English play. Other students took part in an English singing competition.

- 10 There was also a speaking competition. The students had to speak on a topic in English for two minutes.

We spoke to the winner, Henry. "I'm so happy that I won," he said. "I advise people to speak slowly. If they want to be good public speakers, they'd better speak clearly and confidently."

- 15 We also spoke to several other students about English Week. One of them was Amy.

"I really enjoyed English Week. It gave me a chance to learn new words. In my opinion, every school should have an English Week. It's well worth doing," she said.

- 20 On the last day of English Week, the head teacher gave a speech to the whole school. He gave students some suggestions on how to improve their English. "You should communicate in English with your friends whenever you can. You should read English books and magazines, and watch English television programmes. Above all, you should enjoy

* Project

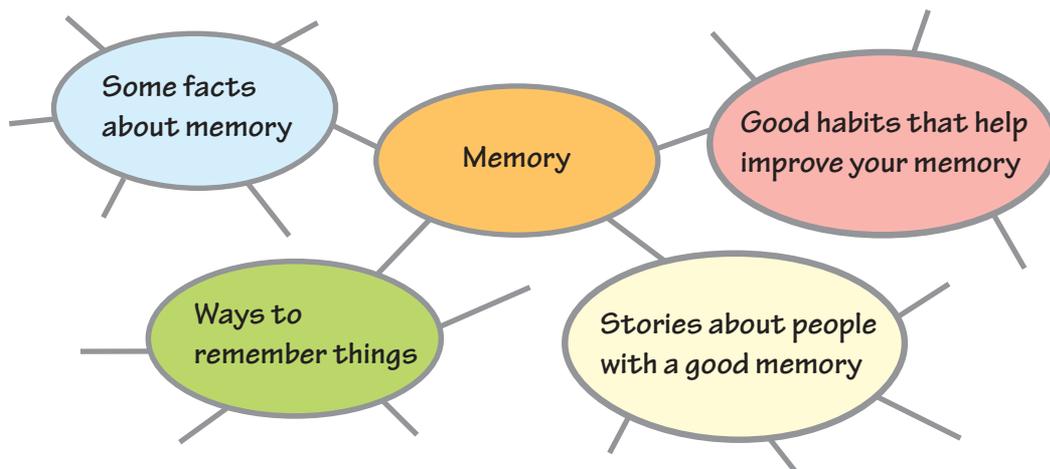

A speaking competition during English Week

Have you ever given a speech to a large group of people? In this project, you will prepare and give a two-minute speech for a speaking competition during English Week.

A In groups of five, decide on the topic you will talk about. You may choose one from the topics below.

computers	English Week	numbers
educational exchanges	great inventions	stories from ancient history
encyclopaedias	memory	

B Each group should brainstorm ideas for the topic. Here is an example.

C Divide the work among the group members.

Students 1 & 2: search for information

Student 3: write the speech

Student 4: make slides

Student 5: give the speech

Use short and simple words and sentences in slides. You can also use pictures, videos or sound effects to make your slides more interesting.

D Write your speech. Use the outline and the example below to help you.

<p>Introduction (Introduce yourself and the topic of your speech.)</p>	<p>Three good habits that help improve your memory</p> <p>Dear teachers and students,</p> <p>I'm (your name).</p> <p>Do you want to have a better memory? Many people would say "yes". But how?</p>
<p>Body (Give specific information in several points.)</p>	<p>First, exercise every day. When you exercise your body, you also exercise your brain. Your brain gets more oxygen when you do exercise like a 20-minute walk.</p> <p>Second, don't eat too much at a time. Have a good diet. This will help your brain become healthier.</p> <p>Third, be happy. If you're happy, your mind will become livelier and your memory will become sharper.</p>
<p>Conclusion (Make a summary.)</p>	<p>If you have these habits, your memory will improve. You'll do better in your studies and in your life. Thank you for listening.</p>

E Student 5 of each group should give the speech to the class. Then as a class, decide on the best group to take part in the school's speaking competition during English Week.

Top tip

To catch your audience's attention, you can start with a joke, a question or an interesting fact. Be sure to support your points with figures and facts.
